

DRINKING FOUNTAINS: PURE

| Category: [PIC NIC TABLES / DRINKING FOUNTAINS](#)

PRODUCT DESCRIPTION

Designer: **Lab23**

PURE fountain is composed of a 60/10 mm thick steel sheet structure. The nickel-plated brass tap is of the button type with return spring normally closed, screwed to the 1/2" sleeve and connected to the stainless steel pipe with threaded end for connection to the water mains. The structure is fixed with four screws to be inserted in 12mm diameter holes. The tank is made of 20/10 thick sheet steel and has dimensions 600x245mm and depth 100mm; it is equipped with a drain hole and overflow Ø 21mm. Above the tank there is a drain, removable to allow the cleaning of the tank, size 600x300mm and thickness 50/10. The overall dimensions of the fountain on the ground are 442x200 mm. The product is treated with a cycle of sandblasting, cathaphoresis and PP powder coating with RAL colors of your choice.
