

BENCHES: CROSSED

| Categories: [BENCHES](#), [URBAN DESIGN](#)

PRODUCT DESCRIPTION

Designer: [Stéphane Chapelet](#)

CROSSED bench is made of 50/10 thick steel. This urban furniture seat is characterised by a particular laser cutting "texture" called CROSSED. Under the seat 2 strong reinforcement plates in 50/10 thick steel are welded. At the base of the seat there are 2 folds, each with 4 holes of Ø 12 mm, for fixing to the ground by means of special dowels (not supplied).

This urban furniture product is realized with steel which is subsequently treated with an electrolytic galvanisation and PP powder painting with Ral colour of your choice.

As an alternative to steel, production with Corten steel can be requested. In this case the material is treated with a special oxidation cycle.

Max dimensions:

Height seat: **437 mm**
Height backrest: **730 mm**
Length: **1900 mm**
Width: **660 mm**
Weight: **154 kg**

Material: [steel](#)
