

BENCHES: CURVO

| Categories: [BENCHES](#), [URBAN DESIGN](#)

PRODUCT DESCRIPTION

Designer: [Bunch Design](#)

The bench CURVO is made of 3 steel sheets (50/10 thickness) and multilayered elements of exotic wood, welded through a continuous welding, later polished. On the base of the steel structure, there is a strong element in steel (50/10 thickness), meant for the fixing to the ground through specific bolts (not provided). On the upper part of the structure, in order to make it stronger, a rebar in iron (10 mm diam.) is welded.

This product is entirely made in Italy from steel subjected to an electrolytic galvanising cycle and subsequently painted with PP powders with Ral colour of your choice.

As an alternative to steel EN10111DD11, the production in corten is also available, on demand. In this case the material is treated with a specific oxidation process.

The wood used is either Iroko or Okume, treated with natural, water-repellent, UV ray resistant oils.

Size structure:

Height: **941 mm**
Length: **3916 mm**

Size seats:

Height: **424 mm**
Length: **1646 mm**
Width: **423 mm**

Materials: [steel](#), [wood](#)
