PRODUCT DESCRIPTION

Designer: [GIBILLERO Design](#)

DEACON is a bench of net and essential form; consists of 4 solid glulam wood slats of cross section 100 x 100 mm, properly spaced and supported by a steel frame and laser shaped at-folded. The distance between the slats is taken in structural legs with 4 vertical cuts that lighten the bench and characterize the design. DEACON is a product designed for public and private spaces that, in size and quality materials, is designed to have excellent durability.

Dimensions:

1820x475x445 mm
seat height: mm 445

Materiali: [stainless steel and wood](#)
