PRODUCT DESCRIPTION

Designer: [GIBILLERO Design](#)

DOLCEVITA is a modular shelter comprising a structure consisting of 4 tubular steel profile dimensions 60 x 40 mm, properly calendared that become ground anchoring system and cover system. A transverse frame tubular steel profile dimensions 60 x 40 mm always stabilizes the entire shelter. The coverage element is obtained thanks to a thin steel plate anchored to structural tubes; at the front of the cover there is an inscription obtained by laser cutting.

The seat of the bus shelter lives in synergy with its structure, obtained by two lateral elements in laser-shaped steel bearing a series of painted metal profiles.

Side locking elements and back are made of transparent glass "Visarm Windows", polished edge, supported by steel calipers.

overall dimensions 1 module: 1600 x 1735 x h 2430 mm

overall dimensions 2 modules: 1600 x 3470 x h 2430 mm

Materials: [stainless steel](#)
