

CHAIRS: CORAL CORNER

| Categories: [CHAIRS](#), [URBAN DESIGN](#)

PRODUCT DESCRIPTION

The chair CORAL CORNER is made in steel, 30/10 thickness.

All the metal parts characterized by a coral-like texture are welded together through a continuous welding. The trapezoid-shaped backrest, on the two sides of the chair, measures 925x260x30 mm. All the angles of the chair are rounded for the safety of the user. On the lower part of the legs of the chair, an ellipsis-shaped plate (30/10 thick), with a hole of 11 mm diam. for the fixing to the ground through bolts (not provided), is welded.

For the realization of this product made in Italy, Steel EN10111DD11 is used and later treated with a cycle of sandblasting, cataphoresis and powder coating. Such cycle is meant to guarantee the protection of the painted products, in an environment of C4 corrosion class, as requested by the UNI regulations EN ISO 12944-2. The products are eventually polyester-powder coated with RAL colours at choice.

As an alternative to steel EN10111DD11, the production in corten is also available, on demand. In this case the material is treated with a specific oxidation process.

Max Dimensions:

Height backrest: **710 mm**
Height seat: **450 mm**
Length and Width: **530 mm**
Weight: **22 kg**
