

CHAIRS: CORAL CORNER

| Categories: [CHAIRS](#), [URBAN DESIGN](#)

PRODUCT DESCRIPTION

The chair CORAL CORNER is made in steel, 30/10 thickness.

All the metal parts characterized by a coral-like texture are welded together through a continuous welding. The trapezoid-shaped backrest, on the two sides of the chair, measures 925x260x30 mm. All the angles of the chair are rounded for the safety of the user. On the lower part of the legs of the chair, an ellipsis-shaped plate (30/10 thick), with a hole of 11 mm diam. for the fixing to the ground through bolts (not provided), is welded.

This product is entirely made in Italy from steel subjected to an electrolytic galvanising cycle and subsequently painted with PP powders with Ral colour of your choice.

As an alternative to steel EN10111DD11, the production in corten is also available, on demand. In this case the material is treated with a specific oxidation process.

Max Dimensions:

Height backrest: **710 mm**
Height seat: **450 mm**
Length and Width: **530 mm**
Weight: **22 kg**
