

CHAIRS: **CROSSED**

| Categories: [CHAIRS](#), [URBAN DESIGN](#)

PRODUCT DESCRIPTION

Designer: [Stephane Chapelet](#)

The **CROSSED** chairs are made in steel, 40/10 thickness. The seat is characterized by a particular laser-cut texture, called **CROSSED**. To the sides of the chair 2 strong plates in steel (40/10 thick and 20 mm H.) are welded, shaping the outline of the chair. On the base of the chair there are 2 folds, provided with 4 holes (12 mm diam.) for the fixing to the ground through specific bolts (not provided).

For the realization of this product made in Italy, Steel EN10111DD11 is used and later treated with a cycle of sandblasting, cataphoresis and powder coating. Such cycle is meant to guarantee the protection of the painted products, in an environment of C4 corrosion class, as requested by the UNI regulations EN ISO 12944-2. The products are eventually polyester-powder coated with RAL colours at choice.

As an alternative to steel EN10111DD11, the production in corten is also available, on demand. In this case the material is treated with a specific oxidation process.

Max dimensions:

Height with backrest: **728 mm**

Height seat: **435 mm**

Length: **550 mm**

Width: **660 mm**

Weight: **31 kg**

Material: [steel](#)
