

# CHAIRS: FLUXUS

| Category: [URBAN DESIGN](#)

## PRODUCT DESCRIPTION

Designer: [Roberto Semprini](#)

The load-bearing structure of the FLUXUS chair is made in steel sheet, 50/10 thickness. The whole chair is reinforced by steel profiles, 50/10 thickness. The seat and the backrest are made in WPC. The base of the chair is provided with 4 holes (2 per leg) 11 mm diam. For the fixing to the ground through specific bolts (not provided).

For the realization of this product made in Italy, Steel EN10111DD11 is used and later treated with a cycle of sandblasting, cataphoresis and powder coating. Such cycle is meant to guarantee the protection of the painted products, in an environment of C4 corrosion class, as requested by the UNI regulations EN ISO 12944-2. The products are eventually polyester-powder coated with RAL colours at choice.

As an alternative to steel EN10111DD11, the production in corten is also available, on demand. In this case the material is treated with a specific oxidation process.

The WPC (Wood Plastic Composite) material is made of 70% recycled wood and 30% recycled plastic.

### Max Dimensions:

Height with backrest: **900 mm**

Height seat: **472 mm**

Width: **730 mm**

Length: **1000 mm**

Weight of steel: **52 kg**

Materials: [steel](#) and [WPC](#)
