

CHAIRS: SILLON

| Categories: [CHAIRS](#), [URBAN DESIGN](#)

PRODUCT DESCRIPTION

Designer: [Bunch Design](#)

The chair SILLON is made in steel, 60/10 thickness. The seat and the backrest are the result of respectively 2 steel sheets welded together and later polished to make the union of the two uniform. The chair is characterized by a particular, laser-cut texture, called NEW YORK. The support feet are created through 90° folds of the extremities of the legs of the bench. Each one is provided with 2 holes (15 mm diam.) for the fixing to the ground through specific bolts (not provided).

This product is entirely made in Italy from steel subjected to an electrolytic galvanising cycle and subsequently painted with PP powders with Ral colour of your choice.

As an alternative to steel EN10111DD11, the production in corten is also available, on demand. In this case the material is treated with a specific oxidation process.

Max dimensions:

Height of the seat: **453 mm**
Height with backrest: **605 mm**
Length: **650 mm**
Width of the seat: **453 mm**
Weight: **47 kg**

Material: [steel](#)
