PRODUCT DESCRIPTION

Designer: [GIBILLERO Design](#)

BOCU is a bin made from the combination of two pure simple geometric shapes, a parallelepiped and a cylinder, both made of galvanized and painted steel. The parallelepiped is the structural element that is anchored to the ground and, at the same time, is the element that supports the cylindrical vase, equipped with an internal bag holder.

The net design of this product, conceived for indoor and outdoor use, is also determined by the use of color that changes depending on the function.

It is possible to associate this product to the bench and the flower box of the series "BOCU".

Overall dimensions: 600 x 600 x h 900 mm

Capacity: 60 liters

Materials: [steel](#)
