PRODUCT DESCRIPTION

Designer: [GIBILLERO Design](#)

LINO is a high table meant for parking areas where it is possible to relax and consume foods and drinks; the design is inspired by a flower formed by 4 galvanized and painted steel petals, which open in the upper part, becoming the supporting element, then tapering downwards and finally opening again to become a base element on which a circular footrest is welded.

A square-based basket for the collection of waste is located at the center of the flower.

Overall dimensions: diam. 1200 x h 1050 mm

Capacity: 80 liters
