

TREE GRILLES: ALCORQUE ROUND

| Categories: [TREE GRILLES](#), [URBAN DESIGN](#)

PRODUCT DESCRIPTION

Designer: [Bunch Design](#)

The seat/tree grille ALCORQUE ROUND is made in steel, 40/10 thickness, polyester powder coated (or corten, treated with a particular oxidation process). The steel sheets are welded together through a continuous welding, later polished.

The structure is made of 2 halves matched and fixed with 4 screws M8 to be inserted on the side. Under the seat there are strong support profiles, 40/10 thickness.

On the base of each half there are 4 holes, 12 mm diam., for the fixing to the ground through specific bolts (not provided).

This product is entirely made in Italy from steel subjected to an electrolytic galvanising cycle and subsequently painted with PP powders with Ral colour of your choice.

As an alternative to steel EN10111DD11, the production in corten is also available, on demand. In this case the material is treated with a specific oxidation process.

Max Dimensions:

Height: **415 mm**
Outer diameter: **1130 mm**
Base diameter: **900 mm**
Central hole diameter: **400 mm**
Weight: **96 kg**
