PRODUCT DESCRIPTION

Designer: r+p RIGHETTO + PARTNERS

Dimensions
Height: **2242 mm**
Length: **3646 mm**
Depth: **1483/2610 mm**

Materials:
Galvanised Steel

Characterized by a simple and elegant shape, it can be easily placed in any architectural context, from classic to modern. WAVE STRIP is a very robust and functional product where both electric scooters and bicycles can be parked. Equipped with a particular "half moon" closure, it allows the vehicle to be locked using a common padlock, without having to use the chain (heavy and uncomfortable object).
