

ABRIS VOYAGEURS: SETTE

| Catégories : [ABRIS VOYAGEURS / TOTEM](#), [URBAN SMART LIVING](#)

PRODUCT DESCRIPTION

Designer: [GIBILLERO Design](#)

This element of street furniture, designed as a modern sculpture, combines form and function in an innovative way, away from the usual way of designing the shelters.

It consists of a modular structure in steel uprights anchored to the floor by foundations, and suitably spaced from a secondary structure in tubular steel. The structure is completely wrapped in contoured edges that cross laser around the perimeter and that make clean and compelling design. Special effects are obtained by the insertion of luminaires agreement, sealed, all internal agreement between each pillar structure.

Dimensions:

Height: **2465 mm**

Depth: **2300 mm**

Length: **3000 mm**

Material: [steel](#)

Nouveau produit, description en cours de revision.
