

PORTE-VÉLO: OMEGA-P BY NIGHT

| Catégories : [RANGE VÉLOS](#), [URBAN SMART LIVING](#)

PRODUCT DESCRIPTION

Designer: [GIBILLERO Design](#)

Thought as an endless loop (up and down), we realized the system **Omega-p** with steel 8 mm thickness and 12 cm width.

This composite system is multifunction:

- it is a bollard that can also be a bike rack
- using some omega-p together can be a continuous bike rack
- putting in a small deductible bowl, it can be also used as an ashtray.
- shaping it accurately, it can also become a light bollard with the light on two different heights.

Each **Omega-p** element works as a single element but also as a serial element (combining with other elements and each element has its special characteristics referring to the its function).

Overall dimensions:

short base version: overall dimensions 120 x 220 x h 840 mm

long base version: overall dimensions 120 x 375 x h 840 mm

Materials: [steel](#)
